

# **Space Seeds science project**

**1. Problem**

**2. Hypothesis**

**3. Supplies**

#### **4. Procedures**

**5. Observations.** Write down your findings.

<b>Day</b>	<b>Observations (text, photos and pictures)</b>

<b>Day</b>	<b>Observations (text, photos and pictures)</b>	

## **6. Conclusions**

**1. Was your hypothesis correct?**

**2. Did the Space Seeds and Earth seeds germinate at the same, or different rates?**

**3. Did the Space and Earth plants grow at the same, or different rates?**

**4. Were there differences between the seeds when they were growing in the Petri dish?**

**5. Were there differences between the plants when they were growing in soil?**
